

Welcome to the Cmap Scoring Tool

Before we start, please open “Cmap Tools” and check the following:

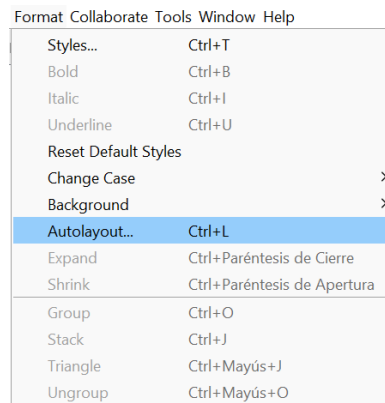

- Check for misspellings via **Tools -> Spelling...**

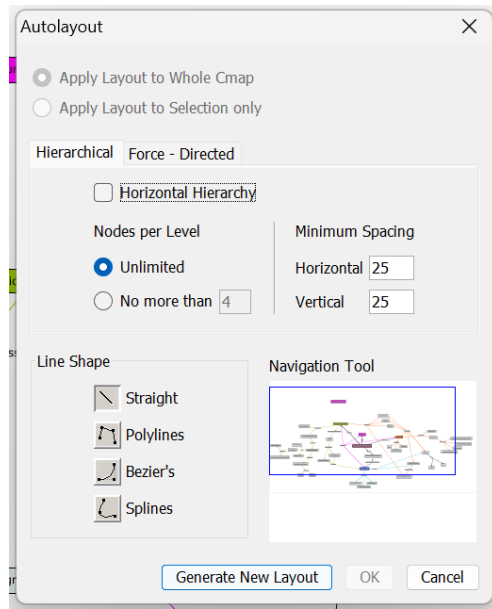

- Go through the Cmap to select and replace the word with the adequate spelling.

- Check for hierarchical structure via **Format -> Autolayout**, then click on **Generate New Layout**, and **OK**.

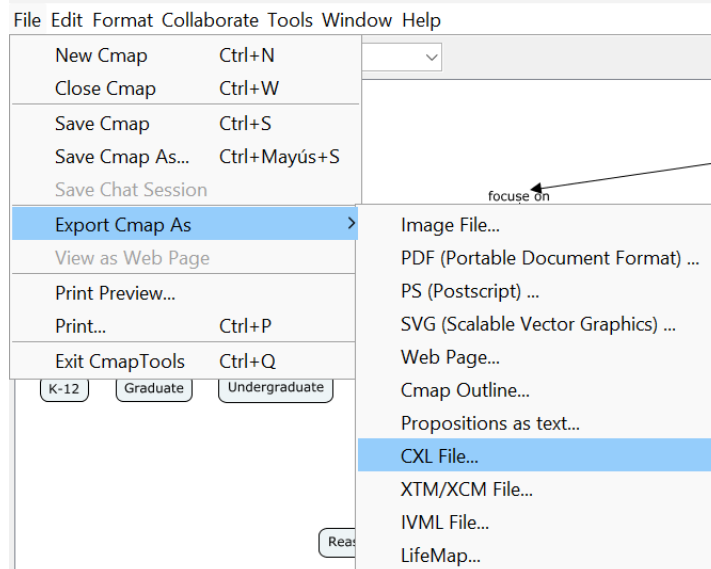

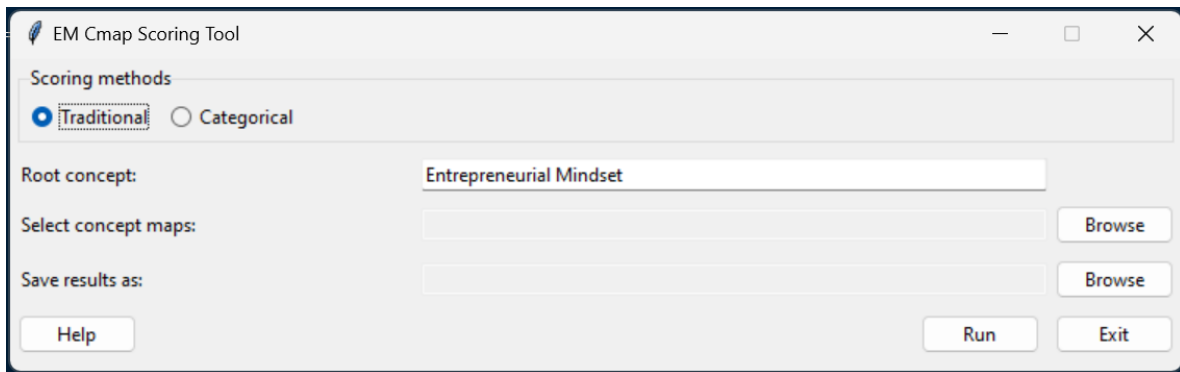

- Check that all concepts are in a concept bubble in one line.
 - The spelling should be the same throughout the maps that will be scored.

Approved	Example	Comments
Yes	Entrepreneurial mindset	Correct spelling and one line.
No	Entrepreneurial miniset	More than one line or incorrect spelling
No	Entreprenurial miniset	Incorrect spelling

- Save the revised Cmaps as .cxl files via **File -> Export Cmap As -> CXL File...**

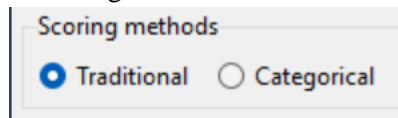

Using EM Cmap Scoring Tool:

The screenshot shows the 'EM Cmap Scoring Tool' window. It has a title bar with standard window controls. The main area contains several sections: 'Scoring methods' with radio buttons for 'Traditional' (selected) and 'Categorical'; 'Root concept:' with a text field containing 'Entrepreneurial Mindset'; 'Select concept maps:' with a text field and a 'Browse' button; 'Save results as:' with a text field and a 'Browse' button; and a bottom row with 'Help', 'Run', and 'Exit' buttons.

1. Select the scoring method. You can choose either "Traditional" or "Categorical".

This close-up shows the 'Scoring methods' section. It features a label 'Scoring methods' and two radio buttons: 'Traditional' (which is selected with a blue dot) and 'Categorical'.

2. Write down the root concept that will be used as the starting node for the calculations.

This close-up shows the 'Root concept:' label and a text field containing the text 'Entrepreneurial Mindset'.

3. Select the Cmap files from your computer via the **Browse** button.

This close-up shows the 'Select concept maps:' label, an empty text field, and a 'Browse' button.

4. Select the path for the results report via the **Browse** button and rename the file if you wish to. Results will be exported as .CVS.

This close-up shows the 'Save results as:' label, an empty text field, and a 'Browse' button.

5. Click the **Run** button and then open the results report previously saved.

This close-up shows two buttons: 'Run' and 'Exit'.
